

MACHEREY-NAGEL

Most Wanted Products

Bioanalysis

DNA, RNA and protein purification

- Tailored solution for every application
- Selective benchmarking for your benefit
- Outstanding quality made in Germany

MACHEREY-NAGEL

Founded in 1911, MACHEREY-NAGEL evolved into one of the leading companies in Filtration, Rapid Tests, Water Analysis, and Chromatography.

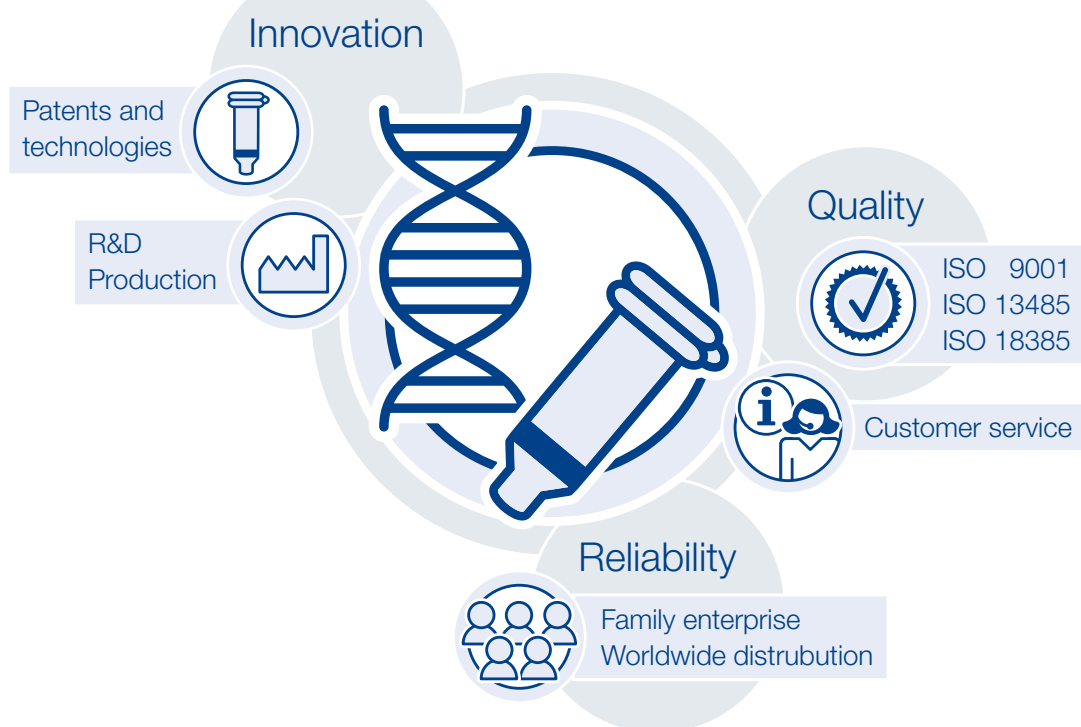

Since 1993, MACHEREY-NAGEL provides ready-to-use kits and consumables for the purification of DNA, RNA, and proteins (Bioanalysis). As pioneers in nucleic acid purification MACHEREY-NAGEL stands for innovation, quality and reliability. Our products are tailored for academic, industrial, and clinical research.

Why MACHEREY-NAGEL?

Because decision is a matter of trust!

Good to know

Endotoxin removal

Endotoxins are co-purified during plasmid preparation from bacteria. Since they interfere with eukaryotic cell survival, endotoxin reduction is essential prior for applications like cell transfection.

A quantitative chromogenic LAL-test was used to assess endotoxin content. As indicated, the content of endotoxin is strongly dependent on the plasmid purification technology. Low endotoxin levels were detected following purification with NucleoSpin® Plasmid Transfection-grade, resulting in a plasmid solution suitable for transfection of common cells. For transfection of sensitive cells, plasmids should be purified with NucleoBond® technology. Applications like cloning or sequencing are insensitive to endotoxins and plasmids can be purified with NucleoSpin® technology.

NucleoSpin® plasmid isolation kits

■ NucleoSpin® Plasmid – The mini prep for standard applications

- The proven plasmid mini prep for molecular biology-grade DNA
- Suitable for high- and low-copy plasmids
- High yields: up to 40 µg of Plasmid DNA

■ NucleoSpin® Plasmid EasyPure – Ultra-fast preparation of plasmid DNA

- Convenient handling due to only one combined washing and drying step
- Our fastest mini prep procedure (14 min/6 preps)
- Liquid RNase A included

■ NucleoSpin® Plasmid Transfection-grade – Mini prep plasmids even for transfections

- Our new solution for transfection-grade plasmid DNA
- Mini prep procedure with patented endotoxin removal technology (< 50 EU/µg DNA)
- HTP version for high throughput applications available

Plasmid purification products

NucleoBond® and NucleoSnap® plasmid isolation kits

■ NucleoBond® Xtra Midi/Maxi – Classic, but fast and yielding

- Convenient lysate clearing and column loading in one step
- High yield anion exchange prep for 400 µg (Midi) and 1000 µg (Maxi) transfection-grade plasmid DNA
- Fast flow through procedure due to large column diameter

- Column filter for parallel lysate clearing and binding
- Large column diameter for high gravity flow-through rates
- Optimized anion-exchange resin for high plasmid DNA yield

■ NucleoBond® Xtra Midi/Maxi EF – Ultrapure for your transfection

- Endotoxin-free plasmid DNA (< 0.05 EU/µg DNA) for highly sensitive applications
- Up to 1 mg endotoxin-free plasmid DNA with one single maxi prep
- Protocols for low-copy plasmids available

■ NucleoSnap® Plasmid Midi – The new column design

- Isolation of 400–700µg plasmid DNA with time saving filtration technology (25 min / 6 preps)
- Innovative column design for vacuum processing of large volumes (50 mL) and elution in mini spin format (200 µL–500 µL) by centrifugation
- Endotoxin removal buffer for successful transfections

DNA clean-up products

Gel/PCR and Sequencing DNA clean-up kits

■ NucleoSpin® Gel and PCR Clean-up – The two-in-one kit

- One uniform binding buffer with pH indicator for indication of optimal binding conditions
- High recoveries of small fragments down to 50 bp
- Special buffers for single stranded DNA or SDS containing samples available

■ NucleoSEQ – Proven technology for big dye removal

- Gel filtration technology in a convenient spin column format
- Pre-filled single spin columns for dye-terminator removal without ethanol precipitation
- Long-term storage at room temperature

■ NucleoMag® NGS Clean-up and Size Select – Select your Fragment size

- Tunable size selection from 150 bp to 800 bp of Next Generation Sequencing library preparation reactions
- Magnetic-bead technology allows for scalability in manual and automated workflows

Genomic DNA purification products

Genomic DNA isolation kits

■ NucleoSpin® DNA RapidLyse – Faster, easier and superior results

- Very fast and powerful lysis of gDNA from cells, tissues and organs
- Processing time of 1 h or less, due to unique lysis chemistry
- Superior gDNA yields compared to standard extraction methods

■ NucleoSpin® Tissue – The proven allrounder for your gDNA Isolation

- More than 16 supplementary protocols for a huge variety of starting materials
- From Mini XS columns for > 0.025 mg sample material to high throughput formats
- Proteinase K included

■ NucleoSpin® Blood – Flexible use and reliable results

- Suitable for all blood stabilization substances (e.g., citrate, EDTA, heparin, CPDA)
- Pathogen detection by isolation of viral DNA or bacterial DNA from 200 µL up to 10 mL blood samples
- Complete removal of PCR inhibitors allows reliable processing

* Kits also available in 8-well strips/ 96-well plate and magnetic bead based format (see page 12)

Genomic DNA isolation kits

■ NucleoSpin® Plant II – Cover all your plant applications

- Comprehensive compatibility with diverse plant materials due to a selectable lysis buffer chemistry including CTAB or SDS
- NucleoSpin® Filters for lysate clarification and RNase A included
- Flexible sample amount from 100 mg tissue (Mini), 400 mg (Midi) up to 1500 mg (Maxi)

■ NucleoSpin® Soil – Select your way for pure DNA

- Alternative lysis systems to obtain highest yield from diverse samples
- Ceramic beads included for most efficient cell disruption to obtain up to 10 µg DNA/500 mg soil
- NucleoSpin® Inhibitor Removal Column to remove PCR inhibitors completely

■ NucleoSpin® Food – Find out what's inside your food

- Complete removal of PCR inhibitors from various sample materials
- Even low amounts of partially degraded DNA be purified from complex matrices
- Isolate DNA from up to 200 mg sample material from single prep to HTP

* Kits also available in 8-well strips or/and 96-well plate and magnetic bead based format (see page 12)

RNA isolation kits

■ NucleoSpin® RNA Plus – Ultrafast and convenient

- Lysate clearing and gDNA removal with one column only
- No time-consuming rDNase digestion necessary (20 min/6 preps)
- New efficient lysis buffer, no β -mercapthoethanol or TCEP necessary

■ NucleoSpin® RNA – The Mini prep for your standard applications

- High integrity RNA from various sample types
- NucleoSpin® Filters included for efficient sample homogenization
- RNA Isolation from Mini XS columns for < 5 mg sample material to HTP applications

■ NucleoSpin® miRNA – The most selective way to get your miRNA

- Parallel isolation of small (<200 nt) and large (>200 nt) RNA from various sample types
- Excellent RNA recovery and purity by chaotropic salt lysis without phenol/chloroform (patent pending)
- Additional isolation of total protein fraction ready to use for SDS-PAGE and Western blot analysis

* Kits also available in 8-well strips/ 96-well plate and magnetic bead based format (see page 12)

RNA isolation kits

■ NucleoZOL® – The new generation of liquid RNA isolation

- High yield total RNA extraction from all kind of samples
- No chloroform, no phase separation: easy and safe procedure
- Flexible protocol allows fast (< 1 h) isolation of total RNA in one fraction or two separate small (10-200 nt) and large (>200 nt) fractions

Reag

■ NucleoSpin RNA Set for NucleoZOL® – Speed up your experiment

- Mini spin column and buffer set for the isolation of RNA from NucleoZOL lysates
- Time saving and convenient handling of NucleoZOL lysates for high concentrated eluates (60 µL).
- Superior RNA yields due to the efficient NucleoZOL lysis with a typical recovery of 85-95%

Pathogen nucleic acid isolation products

Pathogen nucleic acid isolation kits

■ NucleoSpin® Virus – One kit for viral RNA and DNA

- Reliable virus extraction from cell-free biological fluids like fresh or frozen serum / plasma treated with EDTA or citrate
- Purification of human or animal viral RNA and DNA from up to 400 µL biological fluids
- Highest sensitivity for DNA and RNA viruses e.g. HIV, HPV, H5N1, HCV, HBV, BTV...

■ NucleoMag® VET – The Allround kit for veterinary diagnostics

- Purification of viral RNA / DNA, parasites and bacterial DNA from all common veterinary sample materials
- Magnetic-bead-based technology for scalable and highly sensitive requirements
- Processing time: 45–120 min/96 preps (45 min for KingFisher® Flex)

* Kits also available in 8-well strips/ 96-well plate and magnetic bead based format (see page 12)

Purification of His-tag proteins

■ Protino® Ni-NTA Agarose – Save money without compromises

- Simply replace your current Ni-NTA products, no optimization or protocol change necessary
- Suitable for small proteins, large protein complexes, proteins with low expression rates – universal use
- Aqueous suspension for batch binding, gravity flow, and FPLC™ applications (1 mL / 5 mL)

■ Protino® Glutathione Agarose 4B - Market-leading performance

- Best choice for cost-effective GST-tag protein purification
- Equivalent to Glutathione Sepharose™ 4B / GStrap™ 4B columns – no protocol change
- High binding capacity with up to 8 mg/mL
