

## Capillary-pistons GILSON

### per micropipette GILSON MICROMAN

CP GILSON capillaries / pistons are made of pure polypropylene, easy to insert and remove, are pre-assembled and ready to use. Fully traceable from the mold to your laboratory bench.

The Gilson logo means original Gilson piston capillary.

The lot number, CP model and volume are indicated on each box.

Color-coded packaging for volume recognition at a glance.  
Helps prevent errors in the warehouse and in the laboratory.

Contamination prevention: clean production environment.  
No trace of metals.

Sterilized CPs available on request:  
complete range of sterilized TIPACKS from model CP10 to CP1000.  
Free of biological contaminants.  
Optimized Packaging: All packages are wrapped in quality plastic
