SEKURFLAME Bunsen lamps

The Bunsen burner is a gas burner used in chemistry.
It burns a continuous flow of gas without the risk of the flame returning in the tube and reaching the cylinder.

SEKUR - FLAME Bunsen model lamps, made of nickel-plated brass, with tap, with air adjustment ring nut.

Conical hose connector (suitable for methane gas pipe or for LPG gas)

Model 4770851 is equipped with a flame stabilizer.

Valve approved by the CSE

Available versions:

- LIQUID GAS (LPG)
- METHANE GAS (NATURAL)
- POLIGAS (LPG / NATURAL)

dim. mm 11 x 130 H
