

Pharma soap medical - liquid antiseptic for hand and skin disinfection

bottle of 1000 ml

Liquid antiseptic for disinfection of hands and skin.

Contains a combination of a quaternary ammonium salt and orthophenylphenol.

At eudermic pH (5.5), with glycerin, it cleanses and disinfects the skin without irritating.

It reduces the presence of pathogenic or unwanted microorganisms in the hands and skin, preventing the spread of infections.

Medical and Surgical Unit - Ministry of Health Reg. 17106

1000 ml bottle - 12x1000 ml packaging (3 dispensers per carton)

Available packs:

250 ml bottle with dispenser

500 ml bottle (3 dispensers per carton)

5000 ml tank
