

Electric water mixer (rod with stirring fan)

Electric water mixer (rod with stirring fan)

Controls the motor with the water stirring fan, producing a smooth water mixing motion at a fixed speed.

This accessory is placed inside the thermostatic bain-marie tank to occupy a corner on the side opposite the front; consequently the useful dimensions of the tank are reduced by approximately 65 X 80 mm due to the steel box that contains it.

Any optional lid must be flat type.

External dimensions of the product

Width	65 mm
Depth	80 mm
