

Fixed angle rotor 45 ° mod. MICROCLICK 24 x 2 ml

Supports micro-volume protocols, such as nucleic acid preparation, PCR reaction set-up, and filtration, optionally from the complete range of rotors for micro-volumes.

With the Auto-Lock Rotor Change System, you can switch from a swinging rotor to a microtube rotor in just 3 seconds, with the safety of ClickSeal biocontainment lids.

Performance:

on ventilated centrifuge

16,000 rpm

24,328 xg

on refrigerated centrifuge

17,850 rpm

30,279 xg
