Fridge box

Refrigerated containers for the transport of refrigerated samples.

Made of polypropylene, with thermal insulation by expanded polystyrene.

Equipped with carrying handle.

Approved for food and therefore guaranteed completely non-toxic.

Ice units are available containing 0,5 kg of liquid (code 03103707).

The ice unit has an external structure in plastic material, is reusable and fits inside the heat-insulating transport container.

The 32-liter fridge box is able to accommodate a safety container for transporting samples "Safety box" cod. 03100569, while the 45-liter one can hold two.

Code	Description
