

Glass filter funnel with Teflon-coated steel membrane support

Vacuum filtration system for HPLC, for microbiological analysis, particle control, filtration of alkaline and aggressive solutions and buffer solutions.

Filter funnel in borosilicate glass 3.3 ml 250 with membrane support in sintered glass or in Teflon steel for membranes diam. 47/50 mm

List of individual components:

250 ml funnel with flange

PTFE support ring with sintered glass filter plate

PTFE support ring with steel / PTFE filter plate

Metal pliers

Vacuum connector with flange and NS 45

Accessories on request:

- Vacuum flask capacity ml 1000 / ml 2000
- Conical cap in red rubber or perforated silicone
- Rubber vacuum hose
- Membrane vacuum pump

Code	Description	Membrane support type
1341100	Glass filter funnel with Teflon-coated steel membrane support	Steel / PTFE
