

Petri dishes in glass diam. 200 mm

Glass Petri dishes (also called Petri dishes or Petri dishes) are made of 3rd hydrolytic class soda-lime glass, free from cadmium and lead.

Both the bottom and the lid have a flat surface.
This allows for a uniform spread of all nutrient and liquid media.
Optical distortions are minimized by looking through the bottom of these Petri dishes.

Sterilizable at temperatures up to 135 ° C

Reusable
