

Tube swabs with gel transport medium

The swabs in test tubes with transport medium are made in an environment subjected to bacteriological control and are the result of a fully automated production process. The careful selection of suppliers guarantees the high quality of the materials used for the various stages of processing.

Strict controls then guarantee that only the highest quality products reach our customers.

The high-quality blister pack contains a polypropylene tube of approximately 5 ml of transport medium, a plastic (or aluminum) stick with a viscose (or cotton) tip, heat-sealed to the cap.

The particular label allows a perfect hermetic closure to avoid any possible contamination of the pad during use.

Sterilized with gamma rays, each batch is rigorously tested.

ADVANTAGES FOR THE USER

Guaranteed constant quality, sterility, packaging printed in three languages, "CE" marking (Dir. 93/42 EEC - Class I sterile - Annex IX).

The batch code is shown on the label in order to trace the causes of any problems, with the possibility of immediate intervention.

DIMENSIONS

150 mm x diam 12 mm

Pack of 150 pieces

Code	Description	Soil type	Rod type	Buffer material	Pieces per pack.
05326060	Charcoal-free Stuart transport medium swab, aluminum shaft	STUART without carbon	Aluminum	Cotton	150
05326061	Amies transport medium swab without charcoal, aluminum shaft	AMIES without carbon	Aluminum	Cotton	150
05326062	Stuart carbon modified transport medium swab, aluminum shaft	STUART with charcoal	Aluminum	Cotton	150
05326063	Amies transport medium swab modified with charcoal, aluminum shaft	AMIES with carbon	Aluminum	Cotton	150
05326070	Charcoal-free Stuart transport medium	STUART without carbon	Plastic	Viscose	150

Code	Description	Soil type	Rod type	Buffer material	Pieces per pack.
05326071	swab, plastic shaft Amies transport medium swab without charcoal, plastic rod	AMIES without carbon	Plastic	Viscose	150
05326072	Stuart transport medium swab modified with charcoal, plastic shaft	STUART with charcoal	Plastic	Viscose	150
05326073	Amies transport medium swab modified with charcoal, plastic shaft	AMIES with carbon	Plastic	Viscose	150
