

Glass dryers diam. internal 250 mm

with lid with vacuum tap with plastic screw knob

The glass dryers are suitable for drying and dehydration processes, and thanks to the top tap, they are suitable for vacuum storage.

Made of Simax 3.3 borosilicate glass they guarantee:

excellent chemical resistance

minimal thermal expansion

high resistance to thermal shocks

Autoclavable

Perforated ceramic discs are not included - please order separately.

DIN 12491 - ISO 13130 standards
