

Sterile 50 ml screw cap centrifuge tubes with support base

apirogene, R/DNA-SE FREE

TPP centrifuge tubes are manufactured in PP in accordance with USP Class VI and Class 1 medical devices in accordance with Directive 93/42.

There are no additives or substances that can create “release” phenomena in the samples, and they are free of heavy metals.

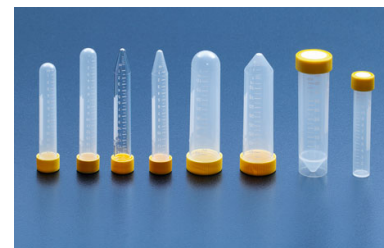

The circular white surface on the screw cap allows writing with any type of pen.

The caps cannot be tightened beyond measure and have a high seal avoiding liquid leaks and evaporations.

Graduation placed on the whole test tube up to the tip.

g-Force max xg. 15,500

Packaged in bags of 20 pieces
