

Sterile graduated pipettes in single pack ml 2

Sterile graduated pipettes in single pack, made of PS polystyrene with excellent optical transparency.

- high visibility of the graduation, bidirectional (ascending, descending) and graduation in addition to the set volume of the pipette
- smooth internals that prevent cell aggregation inside the pipette
- Color coded cotton caps and dispenser boxes for easy identification
- Individually packaged in practical paper bags

Serological pipettes with extra reservoir (25ml and 50ml)

US Patent 8113067 B

- Manufactured with the highest quality polystyrene, they have extremely resistant and robust tips
- the extra tank offers the possibility of having high capacities in a compact and ergonomic design, increasing the total capacity of the volume without adding more length to the pipette
- slim and short shape allows ergonomic working conditions under a sterile hood
- free-fall pipette tip design.
