Laboratory filter paper in EXTRA RAPID flat discs g 90 m2

Fast filtration. Resistant and sterilizable

Filter paper is used for all qualitative analysis applications.

Produced with ennobled cellulose, absence of chlorine, very low ash content and neutral pH.

Different degrees of refining of raw materials and the variation of weights make possible articulated retention powers in order to have filter papers that meet every laboratory need.

Suitable for food contact according to Ministerial Decree 21.03.73 of the Italian Official Gazette and subsequent amendments. Sensory tests (UNI EN 1230-2) for compliance with the general requirements of the EC Regulation 1935/2004 did not reveal any perceptible changes in the organoleptic properties.

EXTRA FAST - PERFECTE 2
Fast filtration filter paper. Resistant and sterilizable

Packs of 100 pieces
