

Large insulating vessels cap. max Liters 21

The Dewar jar is a container that keeps its contents isolated from the external environment by interposing vacuum areas with the outside that allow thermal insulation between the contents and the environment.

Dewar container in borosilicate glass 3.3 DIN / ISO 3585, for dry ice (CO₂), liquid nitrogen and other refrigerants.

The Dewar containers are vacuum insulated and silver plated and encased in a blue painted metal (type C) protective enclosure.

The CAL type with aluminum protective casing is available on request

- robust design
- Grand opening
- lid with handle
- aluminum carrying handle
- side handles depending on the model
