

Dewar dische cap. ml 800

The Dewar vassel is a container that keeps its contents isolated from the external environment by interposing vacuum areas with the outside that allow thermal insulation between the contents and the environment.

Dewar containers in borosilicate glass 3.3 DIN / ISO 3585, for LN2, CO2 and other refrigerants.

Operating temperature from - 200 to + 200 ° C.

Dewar containers are vacuum insulated and silver plated and are protected by an antimagnetic and stainless aluminum coating
