## Dewar container cap. max Liters 4

The Dewar vessel is a container that keeps its contents isolated from the external environment by interposing vacuum areas with the outside that allow thermal insulation between the contents and the environment.

Dewar containers in borosilicate glass 3.3 DIN / ISO 3585, for liquid nitrogen LN2, dry ice CO2 and other refrigerants.

Dewar containers are vacuum insulated and silver plated and protected by an external blue painted metal cladding (type B series).

BE type containers with stainless steel outer casing are available on request.

- robust design
- lid in white polyethylene, with closing hooks
- aluminum handle
