

Socorex Ecostep bioproof blue microdispenser syringes

With just three syringes, the entire volume range from 10 to 5000 μ l is covered.

The syringes and selection key are color coded to avoid setting errors.

The graduation helps to monitor the contents of the syringe.

Quick insertion and removal from Stepper™ pipette.

The materials used (PE / PP) offer excellent chemical resistance.

The red Ecostep™ syringe needs an adapter to fit properly on the Stepper™. The adapter can be removed from the syringe and reused.

Non-sterile syringes supplied in multipacks.

Also available in the Bioproof version, sterilized, individually packaged with high biological purity: each batch is certified by independent laboratories to guarantee the absence of human DNA, deoxyribonucleases, ribonucleases and endotoxin pyrogens).
