

Microtit plates. 96 wells with V-bottom

96-well plates for microtiter / micromethods made of transparent polystyrene, with embossed alphanumeric coding.

Dimensions in mm 128 x 86

Available with flat bottom, "U" bottom and "V" bottom wells.

- Flat bottom: ideal for precise optical measurements and recommended for colorimetric determinations and for microscopy applications.
- "U" bottom: rounded wells are ideal for stirring and washing samples.
- "V" bottom: the shape of the bottom facilitates sample recovery.

The plates are available:

- aseptic in single pack
- sterile by irradiation in single package.

The polystyrene lid must be ordered separately, in the aseptic or sterile version.

Pack.: 50 pcs

Packing: 6 x 50 pcs

CE marking (IVD)
