

Low form beaker (glasses) in PP 5000 ml

with embossed graduation - Class B

Graduated cups made of heat-resistant and highly transparent PP polypropylene, according to the ISO 7056 - 1981 (E) and BS 5404 Standards. Part 1

They have a cylindrical shape, with a flat bottom. The permanent graduation is embossed and easy to read.

The particular shape of the beak facilitates emptying.

They have excellent chemical resistance and are endowed with good chemical inertness.

They are autoclavable at + 121 ° C for 20 minutes and withstand + 100 ° C for continuous use.

Suitable for food contact.
