

## Test tubes PS 12x75 with double locking cap, sterile

Cylindrical test tubes in PS (polystyrene or polystyrene), with round bottom and double-closing cap.

The special double-position cap allows, with a slight pressure, to ensure the aeration of the sample (aerobic cultures) and, with a higher pressure, to obtain hermetic sealing (anaerobic cultures).

Usable from -20 ° C up to +70 ° C.

The tubes are irradiated with ionizing radiation.

CE - IVD mark

RCF max = 3.000g
