

HDPE container with screw cap and 250 ml undercap

Plastic containers are the best solution to problems of fragility, safety and handling of the packaging, thanks to the characteristics of sturdiness (guaranteed by the thickness of the walls and the structure of the packaging), practicality (ensured thanks to the rounded and ergonomic shapes), and safety (due to the quality of the raw materials with which they are made).

These containers, made of **HDPE (high density polyethylene) of neutral color**, are equipped with undercap and screw cap and are easily used in various sectors: from chemical products to animal husbandry and agriculture, up to use as containers for cosmetics. and pharmaceuticals as well as for **food use**.

Thanks to the wide mouth they are suitable for containing: creams, semi-solid substances, crystals, granulates and powders.

Code	Description	Nominal capacity ml	Diameter mm	Height mm	Mouth diameter	Pieces per pack.
