UV germicidal lamp per strumenti 15W - 230 V

This cabin has an ultraviolet germicidal lamp inside that quickly destroys any microorganism.

Recommended for keeping instruments stored inside sterile.

Pre-sterilized instruments can thus be stored for a long time and are always ready for use (treatment with UV rays does not generate heat).

An internal grid keeps the instruments away from the reflective surface allowing them to be uniformly irradiated improving the germicidal action.

Operator safety is guaranteed by a microswitch that automatically switches off the lamp when the door is opened.

Solidly made, exterior in painted metal, interior in reflective stainless steel.

It can be placed on a table or mounted on the wall.

Available in 8 - 15 or 30 W versions

Power supply: 230 V - 50/60 Hz - 1 A.

Italian production.
