Spray bottles

Wash bottles, cylindrical, in PE, designed for dispensing liquids.

Flexible, equipped with a cap through which a folded tube passes, ending with a thin removable tip.

The spray bottles, filled with distilled water, are useful for washing containers, precipitates, etc. or to add small amounts of distilled water.

The simple pressure of the hand on the body of the spray bottle causes the liquid to come out in the form of a thin jet.

Suitable for food contact.

Code	Description	Cap.ml	Diam.mm	Height mm	Pieces per pack.
03100179	Spray bottle ml 50	50	35	96	10
03100180	100 ml spray bottle	100	43	115	10
