

Flat rolls for sterilization 50 mm x 200 m

Flat rolls for sterilization are suitable for packaging medical devices that will have to undergo a steam autoclave or ethylene oxide sterilization process.

They are made of 60 gr medical grade paper, coupled with a PET 12 / PP 40 laminated medical film.

The materials, all certified, offer a constant seal during sterilization and excellent peelability during opening, without releasing paper fibers or tearing the plastic material.
The rolls measure 200 meters for heights from 50 mm to 500 mm

They are equipped with reinforced side seals and colored process indicators, to distinguish products at a glance sterilized from unprocessed ones.

Compliant with the essential requirements set out in Annex I of the European Directive 93/42 / EEC and subsequent amendments (eg European Directive 2007/47 / EC concerning medical devices), as prescribed by Annex VII of the same Decree.

Compliant with regulations:

UNI EN 868-5: 2009, UNI EN ISO 11607-1-2: 2017 and ISO 11140-1: 2015.
