

## Crepe paper drapes for autoclave sterilization

Crepe paper is used to keep package contents sterile after sterilization, during the storage period prior to use.

It can be used for autoclave steam, EO gas and formaldehyde sterilization procedures. They are used together with the indicator tapes, which have an adhesive side to close the packs and a side with the indicators that signal that sterilization has been completed.

Compliant with the essential requirements set out in Annex I of the European Directive 93/42 / EEC and subsequent amendments (eg European Directive 2007/47 / EC concerning medical devices), as prescribed by Annex VII of the same Decree.

Compliant with regulations:

UNI EN 868-5: 2009, UNI EN ISO 11607-1-2: 2017 and ISO 11140-1: 2015.

Code	Description	Dimensions mm	Pieces per pack.
4420105	Crepe paper towels for sterilization 50 x 50 cm	500 x 500	500
