

EKO ZERO powder free nitrile gloves

Pack of 100 pcs

Nitrile gloves are the best choice for elasticity, mechanical and chemical resistance, sensitivity, and ergonomics.

Nitrile is the ideal material for those who handle food or require maximum protection while working in contact with chemicals and/or bodily fluids.

Furthermore, those allergic to natural latex proteins may find this type of disposable glove a valid alternative.

While more expensive and resistant (to traction and puncture) than vinyl gloves, it still offers protection against chemicals, microorganisms, and aggressive chemicals.

Ambidextrous, non-sterile disposable nitrile glove.

Completely powder-free.

The micro-rough surface ensures optimal grip.

Anatomical shape with anti-roll cuff.

Extremely sensitive and durable.

Suitable for sensitive skin.

Light blue.

Weight MIS M: 2.9g +/- 0.3g

CND Code T01020299

- Intended use: Class I Medical Device, Class III Personal Protective Equipment (Type B) certified by Notified Body CE0465.
- Suitable for hospital and outpatient use.
- Also recommended for laboratories.
- Applicable regulations: Regulation (EU) 2017/745 of 5 April 2017 on medical devices. Regulation 425/2016 on PPE.
- Directive 89/656/EEC. Legislative Decree No. 81/2008, Consolidated Law on Occupational Safety.
- Italian Pharmacopoeia, current edition, European Pharmacopoeia, current edition. EN 420, EN 455 I – II – III - IV, EN 374 – 1:2017, EN 374 – 2:2015, EN 374 – 4:2014, EN 374 – 5:2017, EN 16523 – 1:2015. ISO 2859.

The product complies with the requirements of EC Regulation 1907/2006 REACH.
