

Insulated bag 340 x 300 x 220 with handle

Isothermal bags for transporting secondary containers containing biological material.

Available in different sizes, they can contain the secondary container cod. 04306840 (from 40 to 240 tubes Ø 12-16 mm.).

Thermal insulating structure with elastolen padding that allows to transport samples at a constant refrigerated temperature.

Zipper closure.

Possibility of housing refrigerating elements (code 04306802) to maintain the optimum temperature.

Easy to carry thanks to its lightness and handle (code 04306748 also has a shoulder strap).

With document compartment.

Classified as external container (3rd container) according to the European ADR / RID regulations.

Washable at max + 40 ° C

Zip closure

Symbols applied: Biological material UN 3373

Disinfectable with aqueous solutions of the most common disinfectants.

Sterilizable with aqueous solutions of cold sterilants

External material: Polyester 600/900 PVC, blue color

Internal material: Nylon 210/210 coated with PVC
