

Cover glasses th. 1.5 Marienfeld Superior

Coverslips with excellent chemical resistance and flatness.

Suitable for use in fluorescence microscopy

Approved for "in vitro" (IVD) diagnostic applications - "CE" mark

Can be used on automatic slide racks.

CND Code: W0503900202

In accordance with DIN ISO 8255-1: 2003-05 the refractive index is $n = 1.525 \pm 0.0015$.

Marienfeld Superior coverslips do not emit any disturbing auto-fluorescence under the ultraviolet light of fluorescence microscopy.

Thickness n. 1.5 (0.16 - 0.19 mm) from raw material without bubbles or scratches

Thicknesses available on request:

n. 0 (0.085 - 0.115 mm)

n. 1 (0.130 - 0.160 mm - standard thickness)

n. 2 (0.190 - 0.230 mm)

Available on request in circular format (various sizes)

Packaged in boxes with hinged lids containing 100 or 200 pieces.

Packing 10 boxes
