

Graduated cylinders in PP, high shape, cap. ml 250

High transparency special polypropylene PP cylinders.

Compliant with ISO 6706 - 1981 (E)

Permanent graduations embossed and easy to read.

Walls with negligible wettability and complete absence of meniscus.

The equidistance of the graduation lines is ensured by the fact that the walls are almost parallel.

Chemically cleaner than glass as they do not give rise to chemical transfers or absorption.

The shape of the spout minimizes dripping and the pentagonal base, with recess, ensures high stability.

They have excellent chemical resistance; they are autoclavable at + 121 ° C for 20 minutes and withstand + 100 ° C during continuous use.

SUITABLE FOR FOOD CONTACT.
