

Watch glasses diam. 180 mm

in glass with ground edge

Containers made of hydrolytic class 3 soda-lime glass, with a slightly concave circular shape, used in chemistry to evaporate a liquid or weigh small quantities of solids.

When used as an evaporation surface, they allow observation of crystallization or precipitation.

Features

- soda-lime glass of hydrolytic class 3
- cadmium and lead free
- hot ground edges

Pack of 10 pieces
