HDPE cans with screw tap

rectangular base - from 10 to 20 liters

High density polyethylene HDPE tanks, with rectangular base and screw tap.

HDPE is a tasteless, odorless and non-toxic polymer and therefore ideal for contact with food. Compared to the low density grade it has a higher traction, a higher melting temperature and a higher chemical resistance.

If subjected to direct solar irradiation it can show embrittlement and has hydrocarbon solubility at a temperature higher than 60 ° C.

Neutral color

For food use

Self-sealing screw cap

3/4 "tap in high density polyethylene, white color, internal diameter 17 mm with jet breaker, also available as a spare.

Code	Description	Capacity liters	Width mm	Depth mm	Height mm	Mouth diameter mm	Packing
