Socorex QUALITIX graduated tips 5 ml

The new Qualitix® pipette tip program is all about quality, flexibility and compatibility.

A complete line of tips for accurate delivery of liquids that fits not only Socorex® micropipettes but also those of all major brands. The assortment of packs (bags, racks and tipfill rack filling systems), together with a choice of tip types with and without protective filter, offer much appreciated versatility.
Qualitix® tips and Socorex® micropipettes are the perfect match for optimized exam results according to international standards.

The Qualitix® line is characterized by:
˜ Wide choice, superior quality and autoclavability
˜ Bags, racks and systems for tipfill rack filling
˜ Consistency from batch to batch
˜Certification of the absence of nucleases, endotoxins and ATP
˜ Compact packs, less counter space required
˜Wide compatibility with major brands of micropipettes

The various tip types and packaging options offer an extraordinarily large selection of Qualitix® models with capacities ranging from 10 µl to 10 ml.

With the choice of standard or long tips, sterile or non-sterile versions, for gel loading, low binding or filter models, this program offers a solution for any type of application or brand of instrument.

Superior quality pipette tips, cover a range from 0.5ml to 5ml.
All models are autoclavable.
Excellent seal on Socorex® pipettes and compatibility with other brands.

Packaging: bag of 250 pieces
