

Sterile disposable syringes with 10 ml needle 21Gx1 "½ needle

Sterile disposable syringes with needle offer a full range of capacities, manufactured to high quality and safety standards.

General specifications

Sterile medical device, single use.

The transparency of the cylinder allows the control of the mixing, the possible presence of air bubbles and a correct dosage.

The graduated scale is printed in black ink to make it easier to read.

The use of medical grade silicone ensures smooth and safe sliding of the piston.

The handle according to EN ISO 7886-1 allows for easy handling.

Luer connections, central and eccentric, comply with the requirements of the EN ISO 80369-7 standard.

Component Specifications

Cylinder: clear polypropylene with piston retention ring.

Rod: opaque polypropylene.

Piston: non-toxic synthetic rubber with two sealing rings.

Cannula: AISI 304 stainless steel; diameter according to EN ISO 9626 and length according to EN ISO 7864.

Lubricant: silicone for medical use.

Barrel: colored polypropylene in accordance with EN ISO 6009.

Graduation scale: complies with the requirements of EN ISO 7886-1.

Needle cover: transparent polypropylene.

Blister (sterile barrier system): medical paper - plastic film

Method of sterilization

10% ethylene oxide + 90% CO₂; cycle validated according to EN ISO 11135.

Medical Device with CE mark.

Cod. CND A02010601

Available, on request, with needles of other dimensions (diameter x length)
