

1-stroke calibrated volumetric glass pipettes class AS

(full delivery)

Volumetric pipettes are used to dispense liquids.

In one-line calibrated pipettes, a circular mark is printed which indicates the volume which corresponds to the nominal volume of the pipette. Volumetric pipettes are "Ex" calibrated (to dispense): the printed volume refers to the quantity of liquid dispensed.

AS class:

"A" indicates maximum precision, "S" for fast dispensing (waiting time reduced to 5 seconds). The tolerances of class AS are half of the tolerances of class B according to DIN ISO standards.

Features:

Compliant with DIN EN ISO 648 standard except for 3ml, 4ml and 15ml capacities

Made of lime soda glass

Specially formed, blunt and fire polished tips and ends

Calibrated tips provide short waiting times

Color coded for easy identification

With tolerance indication

With 1 circular sign

Class AS volumetric pipettes with certificate of conformity with German calibration regulations (DIN 12 600) and relevant standards are available on request.

Code	Description	Capacity ml	Tolerance	Pieces per pack.
1203101	Volumetric glass pipettes cap. 1 ml	1	± 0,008 ml	50
1203102	Volumetric glass pipettes cap. 2 ml	2	± 0,010 ml	40
1203103	Volumetric glass pipettes cap. 3 ml	3	± 0,010 ml	50
1203105	Volumetric glass pipettes cap. 0.5 ml	0,5	± 0,005 ml	50
1203107	Volumetric glass pipettes cap. 5 ml	5	± 0,015 ml	12
1203108	Volumetric glass pipettes cap. 10 ml	10	± 0,020 ml	10
1203113	Volumetric glass pipettes cap. 20 ml	20	± 0,030 ml	25
1203114	Volumetric glass pipettes cap. 25 ml	25	± 0,030 ml	20
1203117	Volumetric glass	50	± 0,050 ml	10
