

Volumetric glass pipettes cap. 5 ml

calibrated in 2 sections class AS

Volumetric pipettes are used to dispense liquids.

Two-stroke calibrated pipettes have two printed circular calibration marks, indicating the volume which, within these, corresponds to the nominal volume of the pipette.

AS class: "A" indicates maximum precision, "S" for fast dispensing (waiting time reduced to 5 seconds). The tolerances of class AS are half of the tolerances of class B according to DIN ISO standards.

Features: Compliant with DIN EN ISO 648 standard except for 3ml, 4ml and 15ml capacities Made of lime soda glass Specially formed, blunt and fire polished tips and ends Calibrated tips provide short waiting times Color coded for easy identification With tolerance indication With 2 circular signs

Class AS volumetric pipettes with certificate of compliance with German calibration regulations (DIN 12 600) and relevant standards are available on request.
