PTFE filter membranes diam. mm 47 porosity 0.2

white - not sterile

Teflon polytetrafluoroethylene (PTFE) membranes have excellent resistance to solvents and acids and are ideal for air and gas filtration.

Flow rate of 0.2 l / min for 0.2 µm,
0.3 l / min for 0.45 µm,
1.6 l / min for 1.2 µm e
4 l / min for 5 µm

Hydrophobic.

Autoclavable at 121 ° C or 134 ° C or with ethylene oxide.
Packs of 100 flat discs.

Membranes with different porosities and diameters are available on request.
