

PEHANON pH-indicator papers - pH 0-1.8

for the determination of the pH of colored samples

PH indicator papers for colored samples.

PEHANON® Test Strips combine the pH indicator and reference color chart on one strip, allowing an unaltered pH reading even in colored solutions.

Safe test for dangerous samples

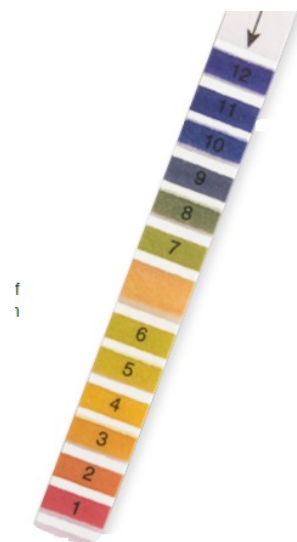

An invisible hydrophobic barrier just above the upper color field prevents sample migration.

The handle remains dry and clean and the user is safely protected from contamination due to capillary rising.

The single strips make the product very economical.

Packs of 200 pieces

Product validity: 3 years

Measuring range: 0 0.3 0.6 0.8 1.0 1.2 1.5 1.5 1.8
