Tygon S3 ™ E-3603 tube diam. mm 25.4 x 50.8 th. 12.7 - for vacuum

Transparent and flexible tubes for dispensing food and beverages, free of phthalates.

Tygon S3 E-3603 hose is crystal clear, crack resistant and non-oxidizing, non-contaminating and less permeable than rubber hoses.

Tygon S3 E-3603 is specially formulated for flex and abrasion resistance and offers superior durability, which minimizes replacement labor and expense.

Its clear and smooth glass-like inner hole helps prevent buildup for easier cleaning.

Coils are marked at 12 '' intervals for easy measurement.

The Tygon S3 ™ bio-based line of hoses combines the high performance standards demanded by customers with an environmentally friendly, phthalate-free design.

Features and Benefits
Exceptional chemical resistance
Lot-to-lot consistency for reproducible results
Non oxidizing and non contaminating
Smooth and glossy interior wall
It easily slides over fittings and grips tightly for easy installation
It does not contain BPA or phthalates
Standard sizes available to maintain full vacuum at room temperature

Typical applications
Dispensing of food and beverages
Vacuum applications
