

Cryogenic gloves

Protective gloves with CE certification, with inner Teflon glove.

They provide protection at temperatures as low as -160 ° C, making them ideal for working in deep freezers and cold liquids as well as for handling dry ice and liquid nitrogen in the gas phase.

They are not suitable for immersion in liquid nitrogen or other ultra cold liquids.

Available in different lengths:

- 1 wrist,
- 2 forearm
- 3 elbow
- 4 shoulder

Available on request in the WP waterproof version (for use with toxic or infectious substances)
