

Sterile 15 ml Trace Metal Free conical centrifuge tubes

with DNase / RNase free writing band

Trace Metal Free centrifuge tubes perform excellently in high density gradient separation of the sample.

Metal Free Centrifuge Tubes are manufactured using US FDA 21 CFR compliant USP Class VI medical grade polypropylene, free from natural rubber and heavy metals.

These test tubes resist

18,000 xg RCF - 15 ml tubes

20,000 xg RCF - 50 ml tubes

7.000 xg RCF - 50 ml tubes with support base

Conical bottom, pure natural colored screw cap, without additives for easy labeling and without trace metals.

Wide band of silk-screened writing

DNase / RNase Free

Without endotoxins

Free of heavy metals

Without human DNA

635 mm / Hg leak proof warheads

Without ATP and pyrogens

Sterile (Gamma rays)

GC / MS (gas chromatography and mass spectrophotometry test)

IVD 98/79 / EC CERTIFICATE

Packs of 500 pieces (20 x 25)
