

12-well plates for cell culture

Cell culture and tissue culture plates.

Available with different growth surfaces of 4, 6, 12, 24, 48, 96 and 384 wells.

The uniform volume of the well guarantees an equal growth surface

Flat bottom and round bottom plate

The pit surface is specially treated, smooth and streak-free to maximize the usable growth area.

Raised edges on the wells with uniform rings on the lid to reduce evaporation

The single position lid reduces the risk of cross contamination and handling errors

The wells are labeled with an alphanumeric code for easy identification

Suitable for all common tools and automations

Sterilized by gamma irradiation

Non-pyrogenic

In single peel-pack

Available on request with untreated surface.

Packs of 100 pieces
