PCR sealing films, self-adhesive

for ELISA, Real-Time PCR (qPCR)

Whether it is standard PCR, qPCR or PCR, the source material is always valuable and the volume is always low.

To protect the samples and at the same time maintain their sensitivity, the PCR samples must be perfectly sealed.

In case the plates need not only be covered, but also perfectly sealed, these self-adhesive films are available, which can be applied and removed easily, without the use of expensive equipment.

Made of polyester or polypropylene.

Pack of 100 sheets

Code	Description	Applications	Material	Pieces per pack.
53781391	PCR sealing films, self-adhesive	ELISA, Real-time PCR	polyester	100 sheets
