

## Latex teats with rim

Latex dropper with oblong shape, made of natural latex, allow extreme precision in the dosage of liquids.

### Technical data

**Latex** is a milky-looking emulsion with a sticky consistency, generally white in color, found in the cells of numerous plants; it is by far the most elastic natural material known.

Fundamental characteristic is the natural and instantaneous ability to resume the original shape even if subjected to pressure or elongation.

Code	Description	Shape	Color	Pieces per pack.
4464501	Latex teats with olive shape, with rim	oblong	natural	100
4464502	Latex teats with cylindrical shape, with rim, green color	cylindrical	green	100
