

7 ml antistatic weighing boats col. white

Antistatic weighing boats

The weighing boats are available in two versions:

- DS model (diamond shape)
- SQ model (square shape)

have been specially designed to provide a convenient means of carrying out precision weighing with ease. The DS model is available in black or white to ensure exceptional contrast according to the color of the sample to be weighed. Both models have the following advantages for the operator:

- they are not contaminants (hydrophobic HIPS)
- they are easily deformed in the shape of a funnel
- they have a smooth surface and rounded internal corners to facilitate the transfer of samples
- very reproducible tare weight: less than 5% variation
- antistatic

Material: ANTI SHOCK PS
