

Disposable vaginal speculum with lateral screw, sterile, size L

It is a disposable vaginal speculum which, thanks to a patented lateral screw system, allows a secure locking and a gradual adjustment of the valves even when they are subjected to the effort due to the pressure of the vaginal walls.

Made with a fully anatomical and atraumatic profile.

Its transparency allows you to see the interior walls perfectly with the lighting.

Available in three different sizes, small, medium, large, differentiated by the color of the screw:

small: yellow screw mm 20

medium: pink screw mm 28

large: white screw mm 36
