

Graduated glass pipettes with syringe, full drain, class B

ml 20

Graduated pipettes are used to dispense liquids.

The printed volume refers to the amount of liquid dispensed.

Class B

“A” indicates maximum precision, “S” for fast dispensing (waiting time reduced to 5 seconds).
Class AS tolerances are half of class B tolerances according to DIN ISO standards.

Amber graduation

The amber color graduation penetrates the glass surface and is, therefore, more resistant than a blue enamel graduation fused to the enamel.
