

## Tester di temperatura digitale Mod. MAXI-T

The digital thermometer Mod. MAXI-T offers:

- Measurement range from -50 to 200°C ± 0.1°C
- Switchable from C° to °F.
- Hold function and 125 x 3.5 mm stainless steel penetration probe.
- Maximum-minimum temperature memory function and waterproof case
- waterproof
- Works on battery.

The digital temperature tester Mod. MAXI-T is resistant and robust and allows a rapid measurement of the temperature.

It is advantageous in price and can be used in any situation

### USE

- Laboratory
- Food
- Medicine
- Environment
- Industry

### Technical data

Temperature range	from -50 to +200 °C
Resolution	0,1°C from -19.9 to +199.9 °C
Accuracy	±1°C from -20 to +120°C
Battery	round cell LR44/A76
Battery Life	c. 3000 h
Dimensions	158x58 mm
Operation Temp	from -10 to +50 °C

Fast responding semi conductor probe of stainless steel

Type	Sonda di inserimento
Response time	4 sec
Lenght	125 x 3,5 mm
