

pH buffer solution with integrated calibration compartment

pH at 25°C

pH buffer solution with integrated calibration compartment

Available with different pH values. The solutions are colored for easier identification

Upon request, a verification certificate can be supplied.

Ergonomic 500 ml bottle with built-in calibration compartment with table of values according to temperature for accurate calibration

Economical, just the right amount is used for calibration

Code	Description	pH value at 25°C	Quantity ml	color
7507134	pH buffer solution with integrated calibration compartment	4.01	500	rosso
7507137	pH buffer solution with integrated calibration compartment	7.00	500	green
7507139	pH buffer solution with integrated calibration compartment	9.00	500	blue
7507140	pH buffer solution with integrated calibration compartment	10.01	500	colorless
