

pH buffer solution in sachets of 25 ml with certificate of analysis

pH at 25°C - pH 4.01

pH buffer solution with certificate of analysis

Available with different pH values

Box of 20 sachets of 25 ml

A wide range of solutions for pH, is available in the form of practical 25ml sachets. Single-dose sachets with long life time are quick and easy to use.

Each sealed, light-tight sachet holds just right amount of solution.

Every time your instrument is calibrated using these sachets, it like using a newly-opened bottle of solution.

Solutions in sachets are also supply with NIST certificate traceability.

All calibration solutions are provided with a label presenting a reference table of the relationship between pH or conductivity value and temperature, nominal value, batch of production and expire date.

Sachets solution are also available in one value carton box, 20 sachets.
